FCC Compliance

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Re-orient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

CAUTION
Change or modifications not expressly approved by the manufacturer responsible for compliance could void the user's authority to operate the equipment.

Safety Precautions

The following are basic precautions to ensure user safety and reduce the risk of property damage.

Warning/Caution

- Warning:** To warn the user that failure to comply with the instructions may result in serious injury or death.
- Caution:** To caution the user that failure to comply with the instructions may result in damage to property.

• When you install the drive

Place the drive on a level surface.

- Failure to do so may cause the device to fall onto a hard surface, resulting in damage or malfunction.

- Avoid high-humidity environments.

• While operating

- Avoid low- or high-temperature environments.

- If the power cable is not connected properly, it may cause a fire or damage the drive. Check the direction of the power connector and the drive incline before connection.

• Other

- Do not place the drive in direct sunlight.

Handle with caution to prevent damage from external shock.

- Any change or modification not expressly approved by designated qualified personnel could void your authority to operate this device.
- Important to read and understand at all times.

Do not disassemble

Do not drop the drive, and protect it from severe shocks.

- It can damage the drive or cause it to malfunction.

- Never allow food particles or foreign substances to enter the drive casing.

Do not move the drive while in operation and do not attempt to open the disc tray by force.

Make sure to close all working programs before attempting to open the tray and always use the open/close button.

- To protect against the risk of fire, do not spill such liquids as alcohol and benzene on the drive.

Do not use cracked, distorted or damaged discs.

- Do not disassemble, attempt to repair or modify the device without express approval as directed in the manual.
- To reduce the risk of damage, electric shock, and fire.

1. Check to see that the disc does not have a crack before use. If the disc has a crack (especially around the center hole), it is recommended that you make a copy immediately and use the copy instead. When a cracked disc is used continuously, the size of the crack is likely to grow and it will eventually result in irreparable damage to the disc.
2. Do not use low quality discs (i.e., illegal products, scratched or damaged discs).

Introduction

- Design and specifications are subject to change without prior notice.

Design and specifications are subject to change without prior notice.
* To write with the highest speed(20X), you must use 80 pin E-IDE cable.

Connecting the Cables to the DVD Writer

Connecting the Cables

1 Connecting the power cable

- The 4-pin power cable from the internal power unit of your computer must be connected to the power terminal the rear of the DVD Writer.

2 Connecting the EIDE cable

- Insert the EIDE cable, which is connected to the hard disk to the interface terminal.
(Place the red line of the cable close to the Pin 1.)

3 Installing a jumper on the master/slave select terminal

- Connect a jumper to the rear side of the DVD Writer.
If the jumper is connected to MA (Master), it will work in the Master mode.
If the jumper is connected to SL (Slave), it will work in the Slave mode.
If the jumper is connected to CS (CSEL), you can control the device by using the host interface signal CSEL. (In general, connection to MA is recommended.)

4 Connecting the EIDE cable from a sound card

- Connect the 4-pin audio cable between the sound output terminal on the DVD Writer and the audio input terminal on the sound card.

Installing the Drive

System Requirements

Intel Pentium 800MHz(or higher), 256 MB of RAM (or higher)with an EIDE interface, Windows 2000/ XP/ Vista

Installing the DVD Writer

How to install the DVD Writer on your PC. First, remove the cover; connect the cable to the DVD Writer and then to the PC.

1 If necessary, attach a horizontal bracket to both sides of the drive.

- You can purchase these accessories separately from your computer dealer.
(Screws for use: M3 X 6 X 4)

2 Remove the plate from a free expansion slot and install the DVD Writer, as shown in the illustration.

- If you have no free expansion slot, install the drive in place of the diskette drive.
- Make sure to use the standardized screws supplied (M3X6).
- To use screws other than M3X6 may result in malfunction.

Using the Drive/Storing and Cleaning Your Discs

Using the DVD Writer

- 1 Push the power button and boot the computer.
- 2 After booting the computer, open the disc compartment by pressing the Eject button.
- 3 Insert the disc (CD) with the label on the disc facing upwards and close the disc compartment by pressing the Eject button. The indicator light comes on.
- 4 Play the disc (CD).

Playing CD-DA/Audio CDs

- Run the CD player program supplied with the sound card or play the Windows Media Player.

Playing Video CDs

- Follow the instructions provided with the disc.
- A video card or MPEG software and a sound card need to be installed to view video CDs.
- If the drive is vertically installed, you cannot use an 8 cm Mini Disc because the disc is movable.

Storing Your Discs

- Do not place a disc in direct sunlight.
- Store a disc vertically in a well-ventilated and stable location.
- Do not write or attach a label on a disc.
- Do not drop a disc or place heavy objects on it.

Cleaning Your Discs

- Do not touch the surface of a disc; hold it by the edges.
- To clean a disc, polish lightly from the inside of the disc to the outside with a soft cotton cloth.
- The disc may not function properly if there are fingerprints, foreign substances or dust on the disc surface.

Solving Technical Problems

- The friction noise generated during SPIN-UP and STOP is caused by the Automatic Ball Balancing System(ABS) and is not a malfunction.

The DVD Writer is not detected by the computer.	<ul style="list-style-type: none">• Check that the power, audio and EIDE cables are correctly connected to the computer.• Change the EIDE cable and reconnect it to the computer.
